Meta Model API: Global AI Developer Hackathon Credit Terms

These Global AI Developer Hackathon Credit Terms ("Credit Terms") supplement the Meta Model API Terms of Service ("API Terms") and the Meta Model API Acceptable Use Policy ("AUP"), and govern the promotional Meta Model API credits Meta offers to accepted participants in the Meta Global AI Developer Hackathon running October 26 to November 4, 2026 (the "Hackathon"). By submitting a claim for Hackathon Credits, you agree to these Credit Terms in addition to the API Terms and the AUP. Capitalized terms used but not defined here have the meanings given in the API Terms.

In the event of a conflict between these Credit Terms and the API Terms, these Credit Terms control solely with respect to the Hackathon Credits described here. Participation in the Hackathon itself, including judging and prizes, is governed by the Hackathon Official Rules, not by these Credit Terms.

1. Eligibility

1.1 **Who can claim.** You may claim Hackathon Credits only if you: (a) have been accepted as a participant in the Hackathon, as confirmed against the email address you used on your Hackathon application; (b) are at least 18 years old; (c) reside in a country where the Services are available under the Meta Model API Geographic Use Policy; (d) are not an employee, contractor or intern of Meta Platforms, Inc. or its affiliates; and (e) satisfy the conditions in Section 6.2.
1.2 **Account.** You must hold a Meta Model API account in good standing under the API Terms ("Account"). Under the API Terms, all Model API accounts require a valid payment method on file before the Services can be used; this is a standard account requirement, not a condition of participating in the Hackathon. Hackathon Credits are tied to a single Account and are non-transferable.
1.3 **Verification.** Meta may verify your eligibility and may deny, suspend or revoke any claim or Hackathon Credits at any time in its sole discretion, including where you no longer meet the conditions in this Section 1.

2. How to Claim

2.1 **Claim form.** To claim, you must complete the Hackathon Credit claim form provided to accepted participants ("Claim Form"), including your name, the email address used on your Hackathon application, your Account's Team ID, and the required confirmations.
2.2 **Claim period.** The Claim Form is available from the date you receive the Hackathon know before you go email until **November 4, 2026 at 9:00 PM Eastern Time** (the "Claim Period"). Claims submitted after the Claim Period will not be processed.

2.3 **Accurate information.** You are responsible for providing accurate information. Meta is not responsible for credits that cannot be applied because of an incorrect, incomplete or ineligible Account Team ID or email address. Meta may, but is not required to, contact you to correct a claim during the Claim Period.

3. Hackathon Credits

3.1 **Amount.** Upon acceptance of a valid claim, Meta will apply USD $150 in promotional Meta Model API credits to your Account for use with the Services ("Hackathon Credits"). Hackathon Credits are Promotional Credits under API Terms Section 13.3.
3.2 **Limits.** Hackathon Credits are limited to one claim per eligible participant and one grant per Account. Each member of a Hackathon team must claim separately for their own Account. You may not create or use multiple Accounts, or combine teammates' claims on one Account, to obtain additional Hackathon Credits.
3.3 **Use.** Hackathon Credits may be used for any use of the Services permitted under the API Terms and the AUP, including use outside the Hackathon. Hackathon Credits have no cash value and cannot be sold, transferred, exchanged or redeemed for cash.
3.4 **Timing.** Meta will use reasonable efforts to apply Hackathon Credits as soon as possible and within two (2) business days of a valid claim. Credits are applied in batches and may take longer during high volume.
3.5 **Validity.** Once applied, Hackathon Credits do not expire and remain available until used or until your Account is terminated, whichever occurs first.
3.6 **Charges after credits are used.** Hackathon Credits are applied to your usage before any other payment method. Once your Hackathon Credits are used up, further use of the Services is charged at standard pricing to the payment method on your Account under the API Terms. You are responsible for monitoring your usage and any charges beyond your Hackathon Credits.
3.7 **Using Hackathon Credits is optional.** You do not need to claim or use Hackathon Credits to participate, and whether you do so will not affect how your project is judged.
3.8 **Participation is free**. No purchase, payment or payment method is required to apply to, participate in, or submit a project to the Hackathon. Claiming Hackathon Credits is optional. Participants may build with Meta's open-weight models without a Meta Model API account, and spending beyond the Hackathon Credits is never required to compete and does not affect judging.

4. Revocation and Termination

4.1 **Revocation.** Meta may refuse, reverse or revoke Hackathon Credits, in whole or in part, if it believes in its sole discretion that you are ineligible, provided inaccurate information, created duplicate Accounts, engaged in fraud or abuse, or violated the API Terms, the AUP or these Credit Terms. Revoked credits are forfeited.
4.2 **Effect of termination.** Upon termination of your Account or your access to the Services under the API Terms, any unused Hackathon Credits are forfeited. Your Account and access to the Services (subject to standard pricing) are otherwise governed by the API Terms.

5. Miscellaneous

6.1 **Publicity.** Neither party may use the other's name, logo or trademarks in connection with the Hackathon Credits without prior written consent, except that Meta may identify you as a recipient of Hackathon Credits in aggregate or anonymized form.

6.2 **Compliance.** You confirm that you (a) are not the target of US, EU, UK or UN sanctions ("Sanctions"); (b) will comply with all Sanctions and US and other applicable export control laws and regulations; and (c) will comply with applicable anti-corruption laws. By accepting Hackathon Credits, you confirm that you are in compliance with all laws, rules and regulations applicable to any current employer governing the acceptance of things of value, and that you have the authority to accept Hackathon Credits from Meta.

6.3 **Privacy.** Meta uses the information you submit in the Claim Form to verify your eligibility and apply Hackathon Credits, as described in the Meta Privacy Policy. Your use of the Services is governed by the API Terms.

6.4 **Entire agreement.** These Credit Terms, together with the API Terms, the AUP and any applicable Additional Terms, constitute the entire agreement between you and Meta with respect to the Hackathon Credits.

6.5 **Term and modification.** These Credit Terms take effect on the Effective Date and remain in effect until modified or terminated by Meta. Meta may modify these Credit Terms prospectively by posting updated terms. The version in effect on the date your claim is accepted governs the Hackathon Credits applied to your Account.
